Julian Boilen

Experienced full stack software engineer in NYC

julianboilen.com

SIDE PROJECTS

- Built a 'street view' of 1940s NYC using digitized Municipal Archives photos of every building in the city at that time. 1940s.nyc. (2020) *Press:* Frommer's, Time Out, Boing Boing, Brooklyn Paper, Inside Edition
- Developed an interactive visualization of US Census data about artists in the United States in collaboration with a statistician and an NYC artists' collective studying the value of art school. Exhibited on a wall-mounted iPad for 3 months in the Museum of Arts and Design's *NYC Makers* biennial; accompanied the Brooklyn Museum show *Crossing Brooklyn*. censusreport.bfamfaphd.com (2014) *Press:* Hyperallergic
- Produced "Posthumans", a one-season podcast on Posthumanism in collaboration with a posthumanist philosopher and field-leading guests (2020) Link
- Helped launch and grow a low-power FM community radio station in Takoma Park, MD/DC with a custom web application to browse and listen to show archive recordings and playlists and view a programming schedule. (2018, also built initial site in 2011)
- Developed a website for arts and culture grantmakers to learn about the solidarity economy. art.coop (2021)

WORK EXPERIENCE

Stripe, Inc., Senior Software Engineer on Stripe Capital — June 2022-Jan 2025

Designed backend abstractions for extensible lendability checks, earning the Craftsmanship Award for meticulous systems design and mentorship. Drove frontend platform modernization for Stripe's small-business lending product—defined and rolled out modular patterns and guidelines that eliminated 2,000+ lines of legacy code and became the team's new standard. Led engineering efforts for a lending partnership launch through detailed roadmaps, task management, and stakeholder communication, and built a reproducible synthetic-test system safeguarding critical-path flows.
Tech: TypeScript, React, Ruby/Sorbet, MongoDB

FreeWill Co., Senior Software Engineer & Tech Lead — July 2019–Jan 2022

As an early engineer, I created and implemented software patterns that built a solid foundation for rapid development of new and future estate planning products and expansion to new markets, including: a React-based PDF generator, an abstraction for step-based flows, using Tsoa and OpenAPI to generate RESTful routes and a typed frontend client library, a framework for internationalization and localization, and a screenshot-diffing testing system using Cypress. Raised $4B+ for charity.
Tech: Serverless architecture, AWS Lambda, JavaScript, TypeScript, Node.js, React, PostgreSQL.

Squarespace Inc., Senior Software Engineer & Team Lead — July 2018–July 2019

Launched a new team to research, design, and implement features to help businesses with a physical presence manage their online brand across online directory sites like Google Maps. On-boarded new hires and formulated new frontend design patterns in a greenfield project. Held regular scrum rituals and one-on-ones.

Squarespace Inc., Software Engineer — June 2015–July 2018

Deeply involved from the beginning in architecting and building a highly intricate event-sourced custom subscription billing system to accurately bill customers for Squarespace's several products (websites, domains, email, stock imagery) while maintaining a long history of millions of customers in an interminable number of states, producing accurate data for revenue recognition, and collecting global taxes. Worked full-stack across the whole Squarespace product throughout this time. Leveraged microservice architecture, event-sourcing, Spring Boot, PostgreSQL, MongoDB, REST, Kubernetes, React, JavaScript, TypeScript, Java.

Squarespace Inc., Software Engineering Intern — January–August 2014

Siteworx, LLC., Backend Development Intern — June–August 2013

EDUCATION

Rochester Institute of Technology, BS in Software Engineering — Graduated 2015

Summa cum laude
